

Fraunhofer USA Center Midwest

Undergraduate Internships

Overview

Fraunhofer USA, Inc. is a 501(c)(3) non-profit organization. Applied research is the foundation of our organization. Fraunhofer USA bridges the gap between basic research and industry aiming to accelerate technology development resulting in faster market penetration. We partner with our clients from academia, government, and industry to transform original ideas into innovations that benefit society and strengthen the economy.

The Fraunhofer USA Center Midwest is located on the campus of the Michigan State University in East Lansing, Michigan. The Center focuses on next generation materials for a variety of markets, including, automotive, energy, environment, and health. The Center's technology portfolio includes additive manufacturing, coatings, plasma sources, diamond materials and laser applications.

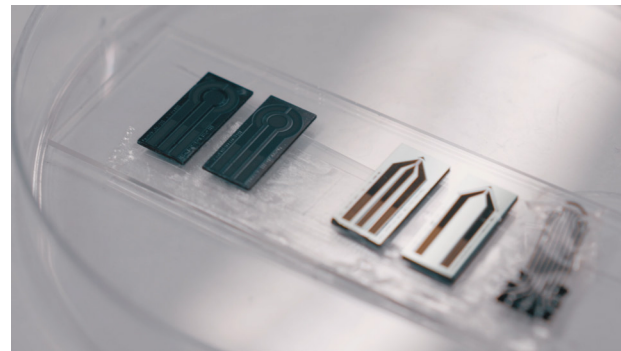

Fraunhofer USA Center Midwest is seeking highly motivated, reliable, and technically competent individuals to join our team. Participating as an Undergraduate Intern you will play an integral part within our diverse team of experts advancing novel research and development processes for a variety of markets.

Undergraduate interns can expect to learn the responsibilities of an engineer within our organization by taking part in several industry and government R&D projects. Interns can also expect to interact with researchers from our industrial customers as well as professors at our academic partners.

This is a paid part-time position during semesters, with the opportunity to work full time during summer breaks. Applicants should be willing to start training immediately. Scheduling is negotiable: we are very familiar with students' class requirements. Interns may also get credit for their experience depending on the college's curriculum requirements.

Internship Openings:

- Software Development Internship
- IT Group Internship
- Additive Manufacturing Internship
